

A man with dark hair, wearing a white button-down shirt with a bright orange collar, is smiling and looking towards the camera. The background is a soft-focus office setting. To the right of the man is a large, glowing incandescent lightbulb with a warm orange glow, set against a dark background. The lightbulb is the central focus of the right side of the image.

**Pitfalls to avoid when implementing
Continuous Delivery at Enterprise level**

Webinar by Phani Bhushan

A bit about me..

- Technical consultant at DevOn
- Trainer from Scrum.org
- Trainer from Microsoft
- Helping enterprises implement continuous delivery
- Reachable via twitter: @phanibca

My share of mistakes while implementing CD at enterprises

**They say we learn
from our
mistakes...**

**That's why
I'm making
as many
as possible.**

- Not focusing on done
- Not enough preparation
- Lack of business alignment
- Lack of agile way of working
- Lack of architecture readiness
- Lack of growth culture and mindset
- Fear of accountability
- Diversity of tooling and pipelines
- Under estimating impact of CD
- Lack of process changes
- Not valuing the power of rhyme (tech Thursdays, Guilds etc)
- Lack of meaningful dashboards and metrics
- Not focusing on whole (systems thinking, value stream)
- and many more....

What's in a name

Continuous
Integration

Commit = Build

Continuous
Delivery

Commit = Shippable
Product

Continuous
Deployment

Commit = Production
Release

What challenges do you see implementing CD?

My share of mistakes while implementing CD at enterprises

They say we learn
from our
mistakes...

That's why
